PROFESSIONAL SUMMARY

Product Manager with 5+ years of experience taking products from 0→1 and scaling them to 500K–10M+ users across consumer, marketplace, and SaaS domains. Track record of owning full product lifecycles, from discovery and architecture through experimentation and growth, driving alignment across 100+ cross-functional team members and consistently delivering measurable outcomes: improved conversion, reduced churn, and expanded revenue. Deep expertise in growth experimentation, personalization, search ranking, and platform scalability across fintech, food delivery, and AI-powered SaaS.

EXPERIENCE

UX Pilot AI

New York, USA (Remote)

Product Manager

Feb. 2026 – Present

- Driving roadmap execution and growth initiatives for an **AI-powered UX prototyping platform**, improving user activation through onboarding experiments and cohort-level retention analysis.
- Leading user research and product experiments to optimize feature discovery and design generation workflows, targeting a 20%+ improvement in free-to-paid conversion rate.
- Partnering with engineering and design to simplify AI-driven prototyping flows, reducing time-to-first-prototype for new users by identifying and removing top friction points across web and Figma plugin access paths.
- Defined and monitored north star and conversion metrics in PostHog; identified instrumentation gaps across key activation events and established reliable tracking baselines to support ongoing free-to-paid conversion experiments.

Pathao Limited

Dhaka

Associate Product Manager

Sep. 2023 – Feb. 2026

- **Growth & Funnel Conversion:** Diagnosed funnel leakage across Food Home → Restaurant → Checkout; led A/B experiments increasing conversion from 25% to 32% (+28%) while reducing search-driven requests by 7%.
- **Promo & Cart Recovery:** Built dynamic promo recommendation and stacking logic increasing promo-to-order conversion by 18% and reducing irrelevant promo exposure by 30%. Automated collection ranking improving collection conversion by 15%; launched cart abandonment automation recovering 6% abandoned carts and increasing reorder basket size by 20%.
- **Behavioral Personalization:** Introduced behavioral ranking and time-slot preference modeling increasing personalized collection CTR by 18%. Built similarity-driven ranking and cross-area personalization improving new-area conversion by 8%.
- **Recommendations & AOV Growth:** Rebuilt "Order Again" logic improving reorder conversion by **10%**. Launched co-order recommendations increasing attach rate by 6% and contributing to **4% AOV growth**.
- **Search & Intent Capture:** Rebuilt restaurant search using intent-driven ranking increasing search-to-order conversion by **22%**. Reduced zero-result searches by 20% through Banglish normalization and typo tolerance.
- **UI/UX Revamps & Friction Reduction:** Led UX revamps improving item-to-cart rate by 6% and rating completion by 15%.
- **Monetization & Commercial Innovation:** Built paid keyword boosting increasing partner CTR by 15%. Launched targeted telco and restaurant campaigns improving campaign conversion by 20%. Introduced co-funded promotion models improving campaign ROI by 20%+. Expanded monetization with Pickup and cross-order recommendations increasing attach rate and AOV.
- **Merchant Platform & Ecosystem Scalability:** Designed standardized POS API integrations reducing partner onboarding time by 35%. Led Restaurant Web architecture revamp reducing operational errors by 20%+. Introduced RBAC and multi-branch account management reducing unauthorized access by 90%. Re-architected menu CRUD supporting variations reducing configuration issues by 25%.
- **Platform Expansion & Web Growth:** Launched Pathao Food Web increasing organic impressions by 60%. Enabled dynamic city configuration reducing new-city launch time by 60%+.

- **Payments & Cashback Ecosystem:** Improved digital payment reliability increasing success rate to 98%. Introduced cashback prioritization increasing digital payment adoption by 8%.
- **Experimentation & Analytics:** Built experimentation framework using cohort analysis and funnel monitoring, improving first-30-day conversion by 30%+. Defined and tracked OKRs across growth, engagement, and monetization pillars, operating across 3 squads (Growth, Discovery, Merchant) and driving alignment across 100+ stakeholders spanning engineering, design, data, and operations.

SciTech Innovations Limited

Dhaka

Product Manager

Jul. 2020 – Sep. 2023

- **0→1 platform build:** Sole PM on Biniyog.com.bd (retail investment) and MyClassroom.online (EdTech LMS); designed system architecture supporting 500K+ active users at 99% uptime, integrated online payment gateway, and led a 10+ person team achieving 95% on-time delivery and 98% defect-free launch rate.
- **Trading & investment suite:** Defined and shipped full DSE trading (real-time portfolio tracking, online buy/sell, fund deposit/withdrawal), BO account opening with automated IPO application and deadline notifications, reducing manual broker visits to zero. Built TradingView-integrated analytics, fundamental + technical screener (P/E, market cap, dividend yield), portfolio signals, and Bangladesh's first paper trading environment.
- **AI & intelligence layer:** Launched AI-powered investment insights and recommendation engine on Biniyog, increasing trade volume by 40% and driving a 50% improvement in user satisfaction through personalized signals and portfolio analysis tools.
- **EdTech platform (MyClassroom):** Architected around 4 user personas (students, teachers, parents, institutions) serving K-12, university, and corporate segments; shipped virtual classrooms, secure exam engine with algorithm-based question generation and fraud detection, assignment workflows, and student performance analytics.
- **Growth outcomes:** A/B testing and post-launch analytics delivered +30% engagement, +25% revenue, +20% conversion, –30% churn over 3 years; expanded Biniyog to multi-asset hub (bank schemes, DPS/FDR, Sanchayapatra, tax tools) and built content engine (DSE news feed, investor newsletter) driving organic acquisition.
